FANTEC NVMe31-FastLock

Case for M.2 PCIe NVME SSD with optimised heat dissipation

The Fantec NVMe31-FastLock is a compact hard drive enclosure for the installation of an NVMe SSD. This particular type of SSD is known for its high transfer speed. Thanks to the USB 3.2 Gen 2 connector, data rates of up to 10 Gbit/s are possible. Due to the simple and quick installation, the SSD is ready for use in no time. Power is supplied via the USB 3.2 Gen 2 interface. The aluminum casing provides ideal protection for your data in mobile use.

Modern NVMe-SSDs get very warm and an effective heat dissipation is absolutely necessary. The passive cooling on the Fantec NVMe31-FastLock is supported by the supplied thermal pad. This makes the SSD „stick“ to the inside of the enclosure so the heat dissipation through the enclosure is optimised. This allows the advantage of speed of NVMe-SSDs to be used even in continuous use.
