

Plug & Play

Super compact & super thin

Quickly ready for use without installation

For storage media, input devices, smartphones, etc.

Turns any computer into a connectivity wonder More USB ports for all your devices, for data exchange and charging.

Many modern devices can be connected via USB, but your notebook or computer only has a limited number of USB ports, which are quickly exhausted.

The FANTEC UMP-4U31-C is a USB-C 3.0 superspeed hub with 4 ports, which is also perfect for on the road due to its compact size. It allows you to expand your PC's USB 3.0 interface with four additional USB 3.0 ports that support data transfer speeds of up to 5Gbps.

This makes considerations about which device may be connected at any given time a thing of the past. Whether external hard drive, USB stick, printer, mouse, keyboard, webcam or smartphone, simply connect your devices. Via the four USB 3.0 ports, your devices can easily exchange data or even be charged.

You have an old computer without USB 3.0 or your USB devices are not yet USB 3.0 compatible? No problem, the UMP-4U31-C is downward compatible and always adapts to the USB standard of your devices.
